Student Report

Dataset Overview:
- Rows: 40
- Columns: 5
- Columns: sr_no, name, class, div, mb_no

Key Descriptive Statistics:
- Total Students: 40
- Unique Classes: 3

Patterns between Name and Class:
- No names found in multiple classes.

Recommendations/Summary:
- The dataset provides a clear overview of student distribution across classes and division
- Marks distribution can help identify performance trends if marks are present.
- Consider further analysis on repeated names for possible data entry issues or twins.
- Use class and division insights for resource allocation and planning.

Class Distribution Table

class	count
TY	28
B.tech	6
SY	6
